**“UMARAS”, UAB
QUALITY, ENVIRONMENTAL PROTECTION AND PACKAGING HYGIENE
MANAGEMENT SYSTEM POLICY**

21st of March, 2019

The mission of “UMARAS”, UAB is to meet the customers’ needs to the maximum extent, providing them with safe packaging of high quality.

The vision of “UMARAS”, UAB is to become a competitive and reliable packaging manufacturer as well as service provider not only in Lithuania, but also abroad.

The management of the Company set the following objectives in order to ensure high quality production of packaging as well as stable and profitable activities of the Company:

- continuously monitor and improve quality, environmental protection, packaging hygiene management systems for reasons of effectiveness as well as environmental performance by ensuring timely identification and elimination of the causes of non-compliance;
- to ensure the compliance of the activities with any requirements of the applicable legislation of the Republic of Lithuania, standards as well as other normative documents;
- to learn and analyse the needs of the customers, to meet their requirements and exceed expectations;
- to improve production processes by upgrading technologies and equipment for the production of safe and hygienic packaging, preparing for potential accidents and carrying out the analysis of the risk factors;
- to implement new technologies for the maintenance and repair of equipment (engines);
- to ensure cooperation with the suppliers and subcontractors, involving them into the implementation of the Company’s policy;
- to improve staff competences and qualifications;
- to involve all employees into the implementation of the quality, environmental protection and packaging hygiene management systems by introducing them to the material environmental aspects;
- to implement all necessary programmes to ensure the safe packaging;
- to organise the activities observing the principles of pollution prevention, to use the natural resources rationally as well as ensure the improvement of waste management in accordance with the legislation;
- to allocate the necessary resources to achieve the objectives as well as maintain and continuously improve the quality, environmental protection and packaging hygiene management system.

The management of the Company undertakes to keep this policy under constant review in order for it to remain relevant, and annually form new objectives and tasks for its implementation.

This Quality, Environmental Protection and Packaging Hygiene Policy is understandable and accessible to all employees as well as interested parties.
